

Constel AI NextGen

Industry-Ready Internship Learning Platform

Industry-driven AI education for tomorrow's innovators.

College Partnership Brochure · 2026

Constel Global India Pvt. Ltd.

Transform Your Internship Program

Constel AI NextGen is a full-stack internship learning and management platform built exclusively for Indian engineering colleges. We bridge the gap between theory-heavy classrooms and industry-ready engineers — with measurable outcomes, verified credentials, and a direct path to paid internships.

The Challenge Colleges Face

- Students struggle in TCS, Infosys, and product-company interviews despite good grades
- TPOs juggle spreadsheets, WhatsApp groups, and disconnected LMS tools
- 2nd–4th year students lack Git, Linux, APIs, and real project experience
- Faculty cannot personally mentor 500+ students on industry tools

Our Solution

An 8-week intensive internship track (~6 months of engineering depth) with live coding, weekly assessments, AI tutoring scoped to each lesson, capstone projects, interview preparation, QR-verified certificates, and a college admin portal for bulk enrollment and analytics. Not a video library — a job-readiness operating system.

Audience	Ideal For	Cohort Size
Students	2nd–4th year CSE, IT, ECE, AI/ML, MCA	50–500 / dept / semester
College	TPO, HOD, internship coordinators	Department-wide rollout
Outcome	Git, APIs, debugging, technical + HR interview readiness	Placement metrics

Three Master Internship Tracks

Each track runs 8 weeks with 200+ structured lessons, hands-on labs, weekly 50-question assessments (80% pass required), interview prep modules, and a capstone project.

Track 1 — Python Engineering Foundations Beginner · 8 Weeks Modules: Linux & terminal · Git & GitHub · Core Python · DSA · OOP · REST APIs · Debugging · Capstone Outcome: Backend-ready intern — automation scripts, REST APIs, production debugging, Git workflow
Track 2 — Full Stack Product Engineering Intermediate · 8 Weeks Modules: React · Next.js · NestJS · PostgreSQL · Prisma · Docker · DevOps · Real-time systems · Capstone Outcome: Junior full-stack engineer — ship features end-to-end from UI to database
Track 3 — AI Engineering & Intelligent Systems Advanced · 8 Weeks Modules: LLMs · RAG pipelines · AI agents · FastAPI · Vector DBs · AI UX · Production AI ops · Capstone Outcome: AI feature engineer — build assistants, RAG systems, and intelligent workflows

Weekly Learning Rhythm

- 12–15 deep-dive topics with CLI commands, workflow diagrams, and comparison tables
- Hands-on labs in browser-based Monaco editor with test cases and AI hints
- Weekly live session with students to address queries — recordings shared after each session
- Lesson-scoped AI tutor for doubts (disabled during quizzes for integrity)
- 50-question weekly quiz — MCQ, debugging, output prediction, scenarios
- Interview prep — 8 industry Q&A; + CLARIFY method + mock dialogue per module

Completion, Credentials & Career Path

Every student who completes the internship track receives industry-recognized proof of mastery — and top performers unlock exclusive career opportunities with Constel.

Internship Course Completion Structured 8-week program with weekly quizzes (80% pass), labs, mini-projects, interview modules, and capstone submission — plus lifetime access to the platform.	QR-Verified Certificate Digital certificate with unique verification ID — shareable on LinkedIn and presentable to recruiters as proof of industry-aligned internship completion.
Internship Letter of Recommendation (LoR) Merit-based LoR from Constel Global India Pvt. Ltd. for students who complete the track with strong quiz scores, capstone quality, and consistent engagement.	Constel Hackathon End-of-program hackathon across partner colleges. Top performers win paid internship slots with a performance-based stipend of ₹5,000–10,000/month.

Paid Internship for Top Performers

Hackathon winners and leaderboard top performers are **directly hired** into Constel's **paid internship program** with a performance-based stipend of **₹5,000–10,000 per month** — real projects, industry mentors, and a pathway to full-time roles. This is not just learning; it is a talent pipeline from your campus to our engineering team.

Student Journey at a Glance

Enroll → Pick Track → Weekly Modules → Lessons + Labs → 50-Q Quiz → Mini Projects → Interview Prep → Capstone → Certificate → Hackathon → LoR → Paid Internship (₹5,000–10,000/mo stipend, top performers)

Platform & Partnership Pricing

What Makes Constel Different

- Live coding sandbox — run and submit code in browser, not just watch videos
- Weekly live mentor sessions — Q&A; with students; every session recorded and shared
- Lifetime access to the learning application for every enrolled student
- AI tutor scoped to current lesson — academic integrity preserved during quizzes
- Built-in industry interview prep every week — not an add-on
- College admin portal — bulk upload, analytics, department-wise progress
- Gamification — XP, levels, streaks, leaderboard for engagement

Investment — Per Student

Student Year	Investment Per Student
2nd Year	■3,500
3rd Year	■4,500
4th Year	■6,999

Includes: full 8-week track, lifetime platform access, live weekly mentor sessions with recordings, live coding labs, weekly quizzes, interview prep, QR-verified certificate, hackathon access, LoR eligibility, and paid internship pathway (■5,000–10,000/mo stipend).

Implementation Timeline

Phase	Duration	Activity
MoU & Setup	Week 1	Partnership agreement, college configuration, TPO training
Pilot	Week 2–3	30–50 students, one track, faculty orientation
Scale	Week 4+	Full department rollout, bulk student upload
Review	Week 8	Analytics review, certificates, hackathon, internship shortlist

Partner With Us This Semester

Launch a pilot cohort with your department. We handle curriculum, platform, assessments, certificates, hackathon, and paid internship pathways.

Next Steps

1. 30-minute live demo for TPO + HOD
2. MoU and partnership terms
3. Bulk student upload (Excel template provided)
4. Student kickoff webinar
5. Week-8 completion review + hackathon + internship selection
